"Case of Multiple Carcinoma Arising from Skin Sweat Glands."

Sofia, Suvremenna Meditsina, Vol 13, No 11, 1962; pp 40-44.

Abstract [English summary modified]: Of 932 patients hospitalized in authors' unit for skin cancer, only 1 had this condition. This was a 37 year old woman whose case is described in detail: multiple small tumors over the dorsum of the hands and fingers and forearms of 13 years' duration. No recurrence since excision 2 years ago. Three photographs, 2 Soviet and 1 Bulgarian reference.

TITLE: The use of saturated and unsaturated aliphatic nitriles as plasticizers for polyvinyl chloride

PERIODICAL: Referativnyy byulleten' Bolgarskoy nauchnoy literatury, Khimiya i khimicheskaya tekhnologiya, no. 2, 1962, 6, abstract 103, Khimiya i industriya, 33, 1961, book 5, pp 134-136 (Rus. and Ger. summaries)

TEXT: Crude and distilled oleic nitrile and stearic nitrile were studied as possible plasticizers for polyvinyl chloride. It was found that nitriles alone could not be used for this purpose, since the crude nitriles migrated, whilst distilled oleic nitrile gave masses with relatively low physicochemical properties. Crude and distilled oleic nitrile can be used to plasticize polyvinyl chloride, in combination with other plasticizers.
